### **MEDIA RELEASE**

## **VICTORIAN COALITION GOVERNMENT TO FUND HEATHMONT INTERSECTION UPGRADE**

The member for Bayswater District, Heidi Victoria MP today announced the Victorian Coalition Government's investment to install traffic lights and signalise pedestrian crossings at the intersection of Armstrong Road and Canterbury Road in Heathmont.

"The Victorian Coalition Government has listened to the local Heathmont community and has now committed to this project," Ms Victoria said.

"Road congestion and pedestrian safety at the intersection have been of significant concern to residents and the Government is now addressing that with the decision to approve funding for this important upgrade."

Ms Victoria said she made direct representation to the Minister for Roads, Terry Mulder, explaining the needs of the local community.

"We will ensure that the current pedestrian lights will be removed, with fully functioning traffic lights to take their place, at the actual intersection. This will make sure that pedestrians, vehicles and cyclists can move through the area safely" Ms Victoria said.

Ms Victoria said the Armstrong Road and Canterbury Road intersection upgrade was a funding priority for the Bayswater District.

"This is a significant investment of more than one million dollars by the Coalition Government that will benefit drivers, pedestrians, the families of Heathmont East Primary School, the local childcare centre and all residents" she said.
